CENTRAL STATISTICAL OFFICE

Monthly Digest of Statistics

No 339 March 1974 HMSO 63p net

A publication of the Government Statistical Service

Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone 01–930 5422 Ext. 602.

Enquiries about orders and subscriptions should be made to the publisher, Her Majesty's Stationery Office, PO Box 569, London SE1 9NH. Telephone 01-928 6977.

Monthly Digest of Statistics

No 339 March 1974

INTRODUCTION

This Digest has been prepared by the Central Statistical Office in collaboration with the Statistics

Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the Digest are mainly totals for calendar months or monthly averages.

Some of the figures included in this Digest are provisional and may be revised in later issues.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January Issue, gives detailed definitions of all the terms and units used in the Digest. The following general definitions should be noted in using the Digest:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Tonne = 1,000 kilogrammes

Gallon = imperial gallon

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

.. not available

- nil or less than half the final digit shown

* average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Supplementary tables

Supplementary tables published recently in the Digest are listed below, together with the date of issue in which they appeared:

Change in content

Tables 169 and 170. General index of retail prices. These tables are now based on 15 January 1974 = 100

⁽¹⁾ Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3. (2) Provisional. (3) Including a fall in the book value of stocks of £280 million in the second quarter of 1973 reflecting tax rebated on the introduction of VAT; the rebate is also included as a deduction from taxes on expenditure and the estimate of gross domestic product at factor cost is thus not affected. (4) This represents taxes on expenditure less subsidies valued at constant rates.

(*) Estimates for 1962–70 have been revised in the light of the preliminary results of the 1971 Census. Figures for 1971 and 1972 have been revised and are based on the final results of the 1971 Census.

(a) The mid-year estimates, for Scotland from 1962-1972 have been revised in the light of the final results from the 1971 Census.

(b) The mid-year estimates for 1971 and 1972 for Northern Ireland have been revised and are based on final (provisional) figures of the 1971 Census. They are not comparable with the estimates for the period 1961-70, which were linked to the 1961 and 1966 Censuses.

(1) Estimates for June 1969(a) are classified according to the Standard Industrial Classification 1958 and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification 1968.

(*) See footnote (*) to Table 16.
(*) The industries included in the Index of production are Orders II-XVIII of the Standard Industrial Classification 1958 and Orders II-XXI of the Standard Industrial Classification 1968.

Sources: Department of Employment Ministry of Health and Social Services (Northern Ireland)

Classification 1936 and Orders in-Act of the standard interaction (*) Excluding private domestic service.

(*) The estimates of agriculture are taken from the June censuses of agriculture and exclude a small number of employees of agricultural machinery contractors. It should also be noted that the figures include seasonal and temporary workers.

(1) (a) Until 1971 the annual employment statistics were derived mainly from counts of national insurance cards. In 1971 a new system was introduced because of proposals to abolish the use of national insurance cards for employees within the next few years.

(b) The new system relies on returns from employers. In order to provide a link between the old system and the new system, both a card count and a census under the new system were taken in 1971. Only a census was taken in June 1972. The results of the census in 1971 have been

reprocessed to provide a basis for comparison with 1972. The results of the census in 1971 have been reprocessed to provide a basis for comparison with 1972.

(c) The old count of national insurance cards included many employees who work for part of the year only and who would not have been in employment in the particular week in June when the census was taken. Mainly for this reason the census figure for June 1971 is considerably lower than the card count. Another difference is that a person who had two regular jobs with different employers in the week of the census was counted twice in the census but only once in the card count, so that the census figures are higher than the card count in some industries and services where secondary employment is common. See footnotes (2) and (3) on page 19.

Note: Figures have been rounded Independently, thus there may be an apparent slight discrepancy between the sum of the constituent items and the total.

(1) The figures include established and unestablished non-industrial and industrial staff but exclude casual or seasonal staff (recruited for periods of normally less than six months) and employees of the Northern Ireland Government. Two part-time employees are counted as one whole-time employee.

(3) The figures prior to 1 July 1972 have been adjusted to show staff in current Ministerial areas so that the figures in all columns are on a comparable basis.

(3) Excluding headquarters staff, but including research and development establishments and Royal Ordnance factories.

(4) These figures include estimated breakdown of certain staff recently recording to Ministerial and Ministerial areas.

(4) These figures include estimated breakdown of certain staff recently transferred to Ministry of Defence and may be subject to later amendment.

(1) The numbers of workers returned from June 1970 onwards are not comparable with those returned in previous years because of changes in the census in the coverage of labour in England and Wales. These changes comprised:

(a) extending the concept of farm work to include managerial and secretarial work;
(b) requesting for the first time the separate return of farmers, partners and directors; and
(c) defining, from 1970 to 1972 'regular whole-time' workers as those engaged in work on the holding for 40 hours or more per week and 'regular part-time' as those engaged for less than

40 hours per week.
(*) Includes family workers but excludes farmers' wives.
(*) Including regular part-time workers.

Note: This table has been revised and is now based on information from the Census of Employment (see footnote (*) to Table 16). The estimates are not comparable with estimates prior to June 1971 which were based on mid-year counts of national insurance cards.

(*) Orders III—XIX of the Standard Industrial Classification 1968.

(*) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

(*) Excluding maintenance staff.

(*) Operatives stood off for the whole week are assumed to have been on short-time to the extent of 40 hours each.

(*) In February 1972, the yourse of overtime and short-time was affected by the power crisis.

^(*) In February 1972, the volume of overtime and short-time was affected by the power crisis.
(*) Figures after June 1972 are provisional and are subject to revision when the results of the 1973
Census of Employment are available.

Note: The presentation of unemployment statistics in this and succeeding tables has been revised on the lines recommended by an inter-Departmental Working Party Unemployment Statistics (Cmnd. 5157). See Department of Employment Gazette, November 1972.

(1) The figures in this table are adjusted to take into account amendments notified on the four days following the date of the count. Figures for married females from May 1972 onwards are not adjusted.

(3) The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed).

⁽¹⁾ Including ex-service men and women and other unemployed persons aged 18 years and over not classified to an industry. Unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) and adult students seeking temporary employment during vacation are excluded. The All industries figures are adjusted to take into account amendments notified on the four days following the date of the count. All other figures from May 1972 are not so adjusted.

(2) The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed).

and unemployed).
(3) Series updated to take account of 1973 data.

See Note to Table 21.

(1) The total unemployment is adjusted to take into account amendments notified on the four days following the date of the count. The analyses by duration from May 1972 onwards are not adjusted. Prior to May 1972, casuals were excluded from this analysis. See Department of Employment Gazette, June 1972.

(') Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each

month.
Invalidity benefit was introduced on 23 September 1971. (*) Invalidity benefit was introduced on 23 September 1971.
(b) Invalidity benefit was introduced on 23 September 1971.
(c) Invalidity benefit was introduced on 23 September 1971.
(c) Invalidity benefit was included industrial disease.
(d) Excluding claims made under the emergency benefit procedure. Figures for Individual months are averages of the four or five weeks starting on the first Monday of each month.
(d) These figures include substantial numbers of persons who have been sick for a long time and who may

(*) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.
(*) Up to May 1972, these estimates are based on a standing sample of claimants. Subsequent figures are provisional estimates derived from the numbers of new claims and will be replaced later by final estimates from the sample. Yearly figures are averages of twelve monthly figures.
(*) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May, August and November.
(*) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Acts 1970 and 1971.
(*) Including a diminishing number of widows with pensions of 30s a week derived from the old Contributory Pensions Acts.
(**) Figures for 1973 are provisional.
(**) Including the elder or eldest child for whom no allowance is payable.
* Average of five weeks.

(*) With effect from June 1970 the census was extended in Great Britain to cover all holdings with significant output including those on one acre of agricultural land or less (previously excluded), at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland excluding holdings of less than one acre until 1972 but numbers of livestock in Northern Ireland ever collected from all owners (including landless stockholders). As from June 1973 the threshold for inclusion in the census was raised from 26 to 40 standard man-days in Great Britain, excluding from the census about 3,000 holdings on 18,000 acres of land in England and Wales and nearly 5,000 holdings on 167,000 acres in Scotland. At the same time the 40 man-day concept was introduced in Northern Ireland resulting in the elimination from the census of some 8,000 statistically insignificant holdings on 40,000 acres of land and the inclusion of 2,000 or so holdings previously excluded (except to the extent of obtaining estimates of numbers of livestock on them) because they had less than one acre of land. (*) Excludes Scotland. (*) Includes maize for threshing in England and Wales. (*) Weight in pods. (*) Shelled weight. (*) England and Wales of the production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage or drying. (*) includes hay from lucerne in England and Wales and from permanent grass in Scotland. (*) Includes the total area of deer forest land in Scotland.

⁽¹⁾ See footnote (1) to Table 33. The figures returned by holdings on one acre or less account for significant differences between the census results as from June 1970 and those for previous years only in the case of pigs and fowls.

(2) From December 1973 figures for Other pigs are Five months old and over returned as 110lb and above, Two months and under five as 45lb and under 110lb and Under two months as under 45lb.

(3) Fowls, ducks, geese and turkeys.

⁽¹⁾ Sales through the Milk Marketing Schemes. (2) The provision of liquid milk at a reduced price was officially withdrawn from April 1971. Approximately 51 million gallons were sold in 1971 up to that time. (2) Whole and skimmed. Excluding skim concentrates and condensed milk used in the manufacture of chocolate crumb. (4) Excluding buttermilk and whey powder. (5) Figures are based on milk usage. (6) Excluding farm production. (7) Cold store stocks. (8) Importers', manufacturers' and factors' stocks. (9) Manufacturers' stocks only. (10) 53 week period.

^(*) A small quantity of molasses spirit is used in beverage spirit production. See explanatory notes in the Supplement to Table 74. (*) The sub-headings indicate the description of the spirits at the time of duty payment. (*) From July 1973 separate information of clearance in bottle is not available for wine at other rates of duty. (*) Provisional.

⁽¹⁾ Figures from 1968 to 1971 are shown in a Supplementary Table to the October 1973 Monthly Digest of Statistics. A historical series presenting a longer run from 1948 to 1972 is given in Economic Trends, November 1973. (2) Industries are grouped according to the Standard Industrial Classification 1968. (2) For an index of construction output (new work only) for Great Britain, see Table 103.

⁽¹⁾ An article introducing this analysis was published in Economic Trends, November 1973.
(2) This does not include grain milling, animal and poultry foods and vegetable or animal oils and fats industries which are classified to intermediate goods—materials.
(3) The total of weights for all index of production industries is 1,000.

⁽¹⁾ For a description of this series, see the article on page 360 of the April 1971 issue of Department of Employment Gazette.
(2) Quarterly estimates are derived as averages of the monthly figures.
(3) In the absence of earnings data for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit of output has been calculated for that month. The indices calculated for January and March 1972 are less reliable than usual.

⁽¹⁾ From January 1971, figures relate to sales by manufacturers in Great Britain employing 25 or more persons, and who are classified to MLH 274 (paint). The figures also include sales of principal products of this industry by establishments classified to MLH 271 (general chemicals) and MLH 494/i and 2 (toys, games and children's carriages). From third quarter 1971, the figures relate to sales by manufacturers in the United Kingdom.

^(*) Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes.

(*) From July 1971 figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 279/I (polishes).

(*) A short standard is 7,200 matches.

March ...

Sources: Department of Industry Iron and Steel Statistics Bureau

^(*) At steel works and steel foundries.

(a) At steel works, steel foundries and blast furnaces.

(b) Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1970 and March 1973 the figures are revised due to re-measurement.

(c) From January 1971, figures include stock of semi-finished steel for the manufacture of heavy products previously not reported.

(c) The figures for 1970 onwards include deliveries of welded tubes over 16 inch outer diameter.

(d) Sa week period.

Average of five weeks.

(*) Lead reclaimed from secondary scrap material, and lead refined from domestic ores.

(*) Including lead imported for processing on toll.

(*) Including production from imported scrap and residues refined on toll.

(*) Including toll transactions.

(*) Including the pure content of virgin alloys.

(*) Excluding virgin content used in the production of secondary metal.

⁽¹⁾ Including chassis delivered as such by manufacturers. The value of deliveries of commercial vehicles is shown in Table 36.

shown in Table 86.

(*) Beginning in 1973 the headings under which data are collected were changed. The new heading of Carderivatives (i.e. vans derived from car chassis) has virtually the same coverage as the heading it replaced, Commercial vehicles not over \(\frac{1}{2} \) tons. Although not all commercial vehicles under \(\frac{1}{2} \) tons gross vehicle weight are classed as car derivatives and it is also possible for car derivatives to exceed \(\frac{1}{2} \) tons gross vehicle weight, the difference between the two categories is small as far as UK production is concerned. The series as given may therefore be regarded as sufficiently continuous for the analysis of trends. The combination of the two series, car derivatives and commercial vehicles under 10 tons gross vehicle weight is identical in coverage with the sum of the two series that have been superseded.

(*) Complete and chassis.

(*) S3 week period.

Merchant shipbuilding('): tankers of 300 gross tons and over(*)

(1) Includes naval vessels registered as merchant ships.
(2) Gross tonnage (100 cubic feet per g.t.) is the total volume of all the enclosed spaces of a vessel.
(3) The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on completion.
(4) Vessels are shown for export if they are for other than UK registration.
(3) Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.
(4) Modifications and cancellations exceed new orders for the period.

(1) Spinning, doubling processing and weaving parts of the cotton industry, plus man-made fibre, wool, carpets and hosiery industries.

(2) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations.

(3) The monthly provisional index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry. These are subsequently revised in the light of sales figures of the principal products of each clothing sector as reported in the quarterly sales inquiries.

(1) The coverage of the inquiry from which this table is compiled was extended at the end of 1970 and the earlier figures have been adjusted to provide a broadly comparable series. It must be emphasised, however, that the conversions have been based on linking factors spanning the 4th quarter 1970 and 1st quarter 1971 only and they should be treated with caution.

From the 3rd quarter 1971 information was collected on a slightly different basis; the figures, therefore, are not fully comparable with those for earlier periods. A link between the two sets of figures is shown in the March 1972 edition of Business Monitor, P. 9, Carpets.
 Prior to the 3rd quarter 1971 these figures relate to woven carpets faced with more than 50 per cent of man-made fibres.
 Prior to the 3rd quarter 1971 export figures are those reported directly by manufacturers. From that date they are those recorded in the Overseas Trade Statistics.

(*) Figures for labour employed by contractors are shown in Table 19.

(*) Figures include repair and maintenance, direct labour of public sector and estimates of unrecorded output by small firms and self-employed workers.

(*) Output of operatives employed directly by government departments, local authorities and certain other public authorities on construction work, excluding gas, water and electricity undertakings.

(*) Provisional.

(*) Excluding building which is wholly financed from private sources. (2) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings Primary and secondary and Special schools. (2) Figures for England and Wales include the value of projects for which specific approval is not required. (4) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than 22,000. (4) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (4) The Scotlish figures of Under construction and Completions are based on the tender costs. The Under construction and Completions figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively. respectively.

⁽¹⁾ The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(2) Including new schools brought into partial use before completion.

(3) Extensions, alterations, remodelling and war damage repairs.

⁽¹⁾ Passenger journey figures are not strictly comparable owing to the transfer from British Rail to London Transport railways of the London Paddington to Westbourne Park service on 1 January 1970. In addition, the new 14 mile Victoria Line was opened to traffic by London Transport in four stages on 1 September and 1 December 1968, 7 March 1969 and 23 July 1971. (2) The four-weekly averages for each year are computed from calendar year totals.

(1) Scheduled services only. All kilometre statistics are based on standard (Great Circle) distances.
(2) Slight discrepancies between certain totals and the sum of their constituent items are attributable to the rounding of figures.
(3) Including weight of vehicles uplifted on vehicle ferry services, mail, excess baggage and diplomatic bags.

⁽¹⁾ The retail sales series are now rebased on the provisional results of the Census of Distribution for 1971. See article in Trade and Industry 8 November 1973.
(2) The indices for all shops, food shops and total non-food shops are shown to one decimal place to help interpretation, but should not be regarded as necessarily accurate to the final digit.
(3) Including co-operative societies' bakery departments.
(4) Excluding co-operative societies bakery departments.
(5) Sales by co-operative societies of durable goods and ironmongery and hardware are included in total sales by durable goods shops.
(6) Including radio and cycle and perambulator shops.
(7) *Average of five weeks. 109

⁽¹⁾Statistics of visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics. These adjustments are summarised in Table 122 above; they are described in detail in United Kingdom Balance of Payments 1973.

(2) Export unit value index as a percentage of the import unit value index. dock strike. (4) Provisional.

(*) The total currency flow, together with Allocation of Special Drawing Rights and Gold subscription to the IMF. (*) From July 1972 transactions with IMF affecting the United Kingdom reserve position in the Fund are included as changes in the official reserves. (*) From 23 August 1971, valued in sterling at transactions rates of exchange. Therefore, from the third quarter of 1971 the sterling valuation of the flow does not equal the difference between the opening and closing levels which are converted at parity in Table 143.

⁽¹⁾ Figures are calculated to end-September 1971 at \$2.40=£1, from end-December 1971 to end-January 1973 at \$2.6057=£1 and from end-February 1973 at \$2.69524=£1. (2) Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries. From July 1972 excludes transactions affecting the United Kingdom gold tranche. (2) Borrowing from other monetary authorities, and a consortium of Swiss banks in 1967, in the form of foreign currency deposits or assistance with a sterling counterpart. (4) From July 1972, the official reserves were redefined to include the reserve position in the IMF. From end-April to end-June 1972, this stood at £292 million.

(¹) In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (²) includes loans to Local, Harbour and Regional Water Authorities. (²) Loans under the Ship Credit Scheme and to the Shipbuilding industry Board, housing associations and building societies. (²) Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer. 130

(*) This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its official reserves.

(*) A negative item represents a surplus, a positive item a deficit.

(*) Including in March of each year transfer of surplus of the death duties surrendered securities

account.

(4) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

(*) Excluding borrowing from the National Loans Fund.
(*) Adjustment for redemption of government guaranteed stock.
(*) Consolidated Fund liability for service of the National Debt: balance carried over until March.

(1) Including receipts from the 10 per cent regulator on most Customs and Excise duties and on purchase tax, operative (1) from 21 July 1966 to 11 April 1967 and (1) from 23 November 1968 to 16 April 1969. (2) The figures given do not include receipts from Northern Ireland, as the duties apply only in Great Britain. Separate duties on betting have been imposed by the Government of Northern Ireland. (3) Includes arrears in respect of earlier years. (4) Provisional.

(1) Average of figures on Wednesdays.

(2) Months: average of figures on Saturdays in consecutive four-week periods as published in The London Gazette or in The Belfast Gazette, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(3) Total notes and coin outstanding, Jess notes and coin held by the Bank of England, Banking Department, and by the London and Scottish clearing banks and Northern Ireland banks.

(4) From I July 1969 all bank clearings are worked on a 5 day week.

(5) Not comparable with earlier figures owing to mergers among the London clearing banks. See Supplement of Definitions and Explanatory Notes.

(6) Not comparable with earlier figures owing to the exclusion of credit transfers processed by Bankers' Automated Clearing Services.

⁽¹⁾ In Northern Ireland included in Other manufacturing.
(2) The annual figures are averages of the figures for February, May, August and November, except for the Northern Ireland figures for 1970, which are the February figures (the others being unavailable owing to the strike of bank employees.)
(3) Because of difficulties of classification it is not possible to include advances made by the six finance houses recognised or confirmed as banks in January 1972 or January 1973. Advances by five finance houses totalled £1,070 million at mid-May 1972. £1,154 million at mid-August, £1,261 million at mid-November, £1,388 million at mid-February 1973 and by all six £1,711 million at mid-May, £1,894 million at mid-August and £2,023 million at mid-November.

(*) Direct business only: i.e. excluding agreements block discounted with finance houses by retailers. The seasonal adjustments have been revised from 1971 onwards in the light of subsequent experience.

(*) Durable goods shops, departmental stores, other general stores, general mail order houses and co-operative societies non-durable goods departments. This series is now rebased on the final results of the Census of Distribution for 1966.

(1) Derived from yield-maturity curves fitted mathematically. The break shows a change in the method: an article in the Bank of England Quarterly Bulletin December 1972 describes the new method of calculating the curve which is now based on the prices and coupons for all stocks except a few with special features. Before 1971, the curve was fitted to yields on stocks with coupons of 5 per cent or more. (The old method was described in the March 1967 Bulletin). The yearly figures are averages of end of month yields. The monthly figures relate to averages of Wednesdays, except for 1971, where they are for end-months. Figures have been revised from January 1973. See article in the Bank of England Quarterly Bulletin September 1973.

(3) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

(4) Averages of daily figures calculated from middle market closing prices.

(4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term,

(*) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1973, published in the Department of Employment Gazette for February 1974.

(*) From and including October 1967 includes (a) dock workers previously on daily or half daily engagements and

(b) postmen.

(b) postmen.

(c) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 167 which cover all industries.

(*) As industrial activity was severely disrupted by restricted electricity supplies the monthly survey was not carried out in February so figures cannot be calculated for this month. (*) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for All industries and services covered.

Average weekly earnings of manual workers in certain industries(')

^(*) The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the Department of Employment Gazette.

(*2*) Revisions to previously published figures take account of late reporting and changes having retrospective

⁽a) In general, males under 21 and females under 18 years of age.

(b) The term Manufacturing industries covers all industries included in Orders III-XIX of the Standard Industrial Classification 1968.

Index numbers of basic weekly rates of all manual workers(')

(1) Revisions to previously published figures take account of late reporting and changes having retrospective effect.
(2) The industry groups are analysed according to the Standard industrial Classification 1968. Figures for All industries and All manufacturing industries are given in Table 166.
(3) Metal manufacture; mechanical instrument and electrical engineering; shipbuilding and marine engineering; vehicles and metal goods not elsewhere specified.

⁽¹⁾ The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(2) The monthly totals in the columns headed increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed Net increases, is therefore the overall net increase for the year.

(2) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages: at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

⁽¹⁾ The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121-4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

^(*) From July 1971, revised method of calculation to include levies on certain imported food materials.

(*) Index of building costs: figures relate to average for the quarter.

(*) The index covers only dwellings on which building societies have advanced mortgages during the period. The cost of land is included. Figures relate to average for the quarter.

Index numbers of wholesale prices

⁽⁴⁾ Reductions in the VAT-exclusive prices of alcoholic liquor, tobacco and cigarettes, matches and mechanical lighters took place in April. These reductions resulted from lower revenue duties designed to offset additional tax revenue from VAT. With unchanged prices in April for these products index numbers for months from April onwards would have been higher by the following: all manufactured products 1-7; chemicals and allied industries 0-2; products of manufacturing industries other than food, drink and tobacco and engineering and allied industries by less than 0-05
(*) Provisional.

(*) Based on manufacturers' list prices.
(*) The market-price series are based on prices before the addition of subsidies when paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.
(*) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies when paid to producers; that for milk on prices paid to producers by the marketing board and that for potatoes on producer prices, sometimes supported by the Potato Marketing Board.
(*) Maincrop potatoes only.
(*) Based on BEMB prices to producers under the Egg Contract Schemes until March 1970. From April 1970 until March 1971 based on guaranteed minimum prices to producers at packing stations and thereafter on average price paid to producers at packing stations.
(*) Based on net prices to farmers after deduction of subsidy.
(*) Provisional.

ANNUAL ABSTRACT OF STATISTICS 1973

The ANNUAL ABSTRACT OF STATISTICS contains a selection of the most important statistics covering the economic, industrial and social life of the United Kingdom. The latest edition gives annual figures so far as they are available for the years 1962 to 1972, and in a few tables also the early months of 1973. The Abstract contains over 400 tables in the following chapters:

Area and climate Balance of payments Banking, insurance, etc. Distributive trades and services n.e.s. Education

External trade
Home finance
Labour
National income and
expenditure
Personal income,
expenditure and wealth

Population and vital statistics Prices Production Social conditions Transport and communications

The Annual Abstract of Statistics, prepared by the Central Statistical Office, is a great boon to anyone who needs instant reference to a wide range of statistics.

Price £2.20 (by post £2.45)

ABSTRACT OF REGIONAL STATISTICS NO 9 1973

This annual publication has been prepared by the Central Statistical Office to meet the demand for detailed regional information and is supplementary to the national figures published in the Annual Abstract of Statistics.

Issue No 9 has been greatly enlarged and includes 15 new tables. It provides a wide coverage of economic and social statistics by standard regions and many of the tables also give details for sub-divisions of regions and for conurbations. It contains an outline map of the standard regions and includes a full description of these regions and their sub-divisions, defined in terms both of local authorities and employment exchanges. An index of the sources of the statistical data enables users to obtain later figures as they appear.

Chapter headings are as follows:

Area and climate Construction and investment Distribution Education Employment
Energy
Gross domestic product
Household surveys

Population and vital statistics Production Social services Transport

SOCIAL TRENDS

No. 4

1973

One of the problems about using social statistics is in finding the significant figure or series from the mass of data, published or otherwise, in hundreds of different places.

The Social Trends team at the CSO does this for you by assembling a highly selective collection of key social and environmental statistics conveniently in this one annual publication.

The latest issue is again larger than before, containing over 400 tables and charts—many in two colours—to highlight the major trends and patterns in contemporary society.

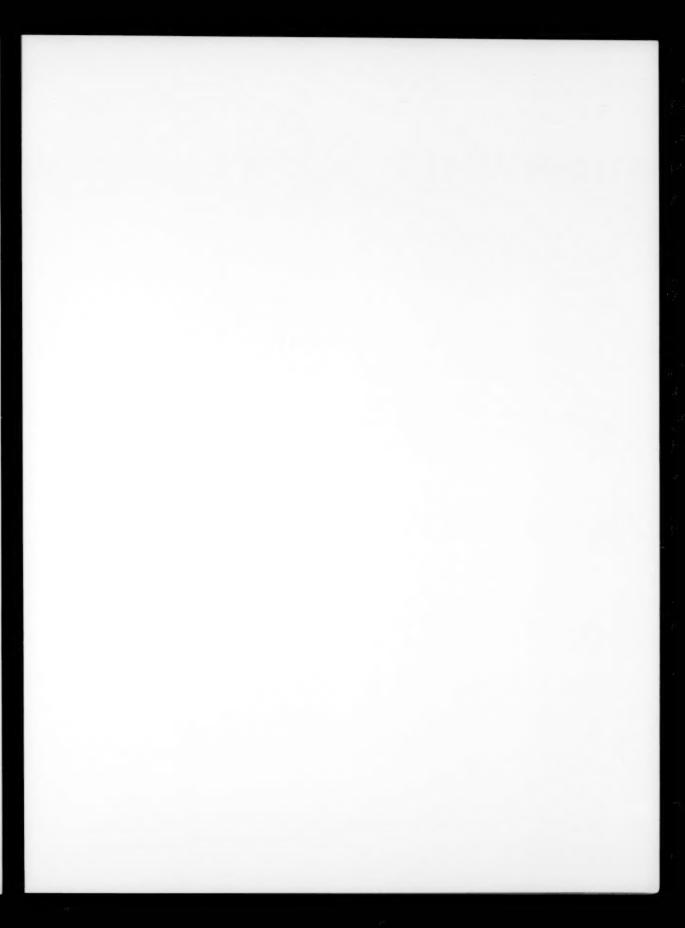

In addition there are five main articles each dealing with a particular aspect of the social scene. They include a social commentary looking at different life patterns between one generation and the next; a description of the characteristics of the elderly; a study of the incidence of mental illness in Britain; and a methodological article on cultural accounting. There is also an extended note on trends in road accidents and casualties.

Social Trends No 4 which builds and improves upon past editions, is still priced at £2.90 (net).
